Introduction

GV-VD5700 is an outdoor camera for optimal day and night surveillance. GV-VD5700 can support H.265 video codec to achieve better compression ratio while maintaining high picture quality at reduced network bandwidths. For night operations, the camera allows up to 30 m (98.4 ft) IR effective distance. The camera also uses P-iris to produce images with better clarity and contrast. It is adjustable in 3 axis (pan, tilt and rotate).

Note:

- Do not use clothes or any ordinary material to clean the camera cover since they may result in scratches.
- Specifications are subject to change without notice.
- Mind the following when using a memory card for recording:
 - Recorded data on the memory card can be damaged or lost if the data are accessed while the camera is under physical shock, power interruption, memory card detachment or when the memory card reaches the end of its lifespan. No guarantee is provided for such causes.
 - The stored data can be lost if the memory card is not accessed for a long period of time. Back up your data periodically if you seldom access the memory card.
 - Memory cards are expendable and their durability varies according to the conditions of the installed site and how they are used. Back up your data regularly and replace the memory card annually.
 - To avoid power outage, it is highly suggested to apply a battery backup (UPS).
 - For better performance, it is highly suggested to use Micro SD card of MLC NAND flash, Class 10.
 - Replace the memory card when its read/write speed is lower than 6 MB/s or when the memory card is frequently undetected by the camera.
- To use the GV-Eye application, change the video codec setting to H.264 for the GV-IP CAM H.265 models.
